PROFESSIONAL SUMMARY

DevOps-driven Software Engineer with hands-on experience designing and building automation-first platforms across deployment validation, infrastructure monitoring, and security auditing. Proficient in Python, JavaScript/TypeScript, and the MERN stack, with practical exposure to Docker, GitHub Actions, Linux, Kubernetes fundamentals, and AWS cloud concepts. Delivered three independent engineering projects applying CI/CD, observability, security, and production-readiness principles to real-world DevOps workflows. Seeking to contribute an automation-first mindset and strong full-stack foundation to a DevOps, Platform Engineering, Cloud, or Site Reliability Engineering team.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, HTML, CSS

Frontend: React.js, Vite, Tailwind CSS, Responsive Design, Component-Based Architecture

Backend: Node.js, Express.js, REST APIs, Authentication & Authorization, API Design

Databases: MongoDB, PostgreSQL, SQLite3

DevOps & Automation: Docker, Git, GitHub, GitHub Actions, CI/CD, Linux, Shell Scripting, Infrastructure Automation, Deployment Automation

Cloud: AWS Fundamentals, Cloud Deployment Concepts, Cloud Architecture Basics

Monitoring & Observability: Infrastructure Monitoring, Container Monitoring, Metrics Collection, Observability Concepts, Dashboard Development

Tools: VS Code, Postman, npm, Docker Desktop, Git CLI

PROJECTS

DeployGuard — AI-Powered Deployment Readiness Analyzer

React • Tailwind CSS • JavaScript • Vite • Node.js • Express • GitHub

- Engineered a full-stack deployment readiness platform that ingests repository ZIP uploads and evaluates production readiness across 10+ automated checks covering Docker configuration, CI/CD setup, environment variables, and security.
- Designed a weighted readiness-scoring engine and risk-assessment dashboard that surfaces missing critical files and misconfigurations prior to deployment, replicating real-world DevOps release-gating workflows.
- Built automated recommendation logic and a responsive React/Tailwind dashboard backed by a Node.js/Express REST API, converting validation results into structured, actionable production-readiness reports.

DevOps Monitoring Platform

React • Node.js • Docker • JavaScript • Chart.js

- Built a real-time infrastructure and container monitoring dashboard modeled on modern observability platforms, tracking CPU and memory utilization across containerized workloads.
- Implemented a metrics-collection pipeline and Chart.js-based visualization layer to surface infrastructure health trends and support faster operational decision-making.
- Architected a React frontend and Node.js backend to continuously poll and aggregate Docker container metrics, replicating core monitoring and observability workflows used by SRE teams.

Your Career Guide — AI-Based Career Recommendation System

HTML • CSS • Django • SQLite3 • AI Integration • GitHub

- Developed an AI-driven career guidance platform that recommends career paths based on users' skills, interests, and assessment results, enabling data-backed decision-making for students and early-career professionals.
- Implemented end-to-end features including user authentication, career assessment tests, personalized AI recommendations, progress tracking, and video learning modules within a cohesive Django-based web application.
- Designed and maintained a normalized SQLite3 database schema to support dynamic content delivery and user-specific recommendation history.

CERTIFICATIONS

AWS re/Start Graduate | Amazon Web Services Training and Certification
Completed the AWS re/Start skills development and job training program featuring real-world scenario-based learning, hands-on labs, and coursework in cloud fundamentals.

Python Using AI | AI for Techies
Completed practical Python programming training with an AI-focused curriculum.

EDUCATION

Master of Computer Applications (M.C.A.) <i>D. Y. Patil Institute of MCA & Management, Akurdi, Pune CGPA: 7.43 / 10</i>	2024 – 2026
Bachelor of Science — Computer Science (B.Sc.) <i>Ajara Mahavidyalaya, Kolhapur CGPA: 8.40 / 10</i>	2021 – 2024
